

## Material Management Module

[VIDEO \(click here\)](#)

### Achieve higher efficiency and yields

#### Material Consumption Tracking

Implement a lean inventory strategy with real-time usage tracking

#### Traceability

Protect your brand and ensure product quality

#### Maintenance Tracking

Guarantee maximum asset performance and productivity

#### Inventory Tracking

Attain real-time visibility of materials on the shop floor

#### Process Route Control

Ensure correct process genealogy with automated tracking

#### Storage Tower Interface

Leverage intelligent storage to sustain productivity and process flow

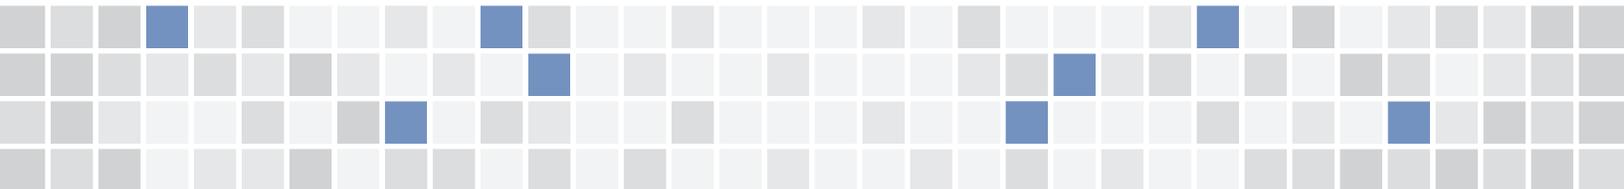

#### MSL Tracking

Track exposure and ensure material conformance

#### Operator Traceability

Identify source of changes and measure efficiency by resource

### Choose the modules and apps for your requirements

Universal's IQ360™ Factory Software Suite is comprised of user-focused smart factory modules designed to control, monitor and improve all aspects of factory operations for maximum productivity. Each module offers dedicated capability bundles and some select apps that can be purchased as needed to meet specific requirements, providing a true “connected factory” production environment.

The **Material Management Module** contains six apps to help you maintain comprehensive factory visibility, track consumption, integrate and manage inventory, streamline maintenance, and secure your reputation with FDA-level traceability. Choose only the functionality that you need.

Apps	Requires Base License		Capability Bundles	
	Line Control	Factory Control	Traceability	Available Individually
