Monitoring & Analytics Module

Leverage real-time data to maximize productivity

Big Data Collection

Analyze and improve utilizing rich data flow

Performance Dashboard

Drive continuous improvement with KPI monitoring at your fingertips

Utilization & Efficiency

Minimize downtime and sustain workflow

OEE & Productivity

Maximize equipment efficiency and performance

Component Wastage

Minimize scrap and identify opportunities for cost savings

Analytics & Correlation

Analyze KPIs and OEE impactors to implement improvements

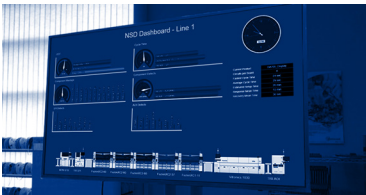

KPI Threshold Alerts

Proactively identify and resolve productivity and yield impactors

Predictive Analytics

Address potential anomalies before they negatively affect production

Choose the modules and apps for your requirements

Universal's IQ360™ Factory Software Suite is comprised of user-focused smart factory modules designed to control, monitor and improve all aspects of factory operations for maximum productivity. Each module offers dedicated capability bundles and some select apps that can be purchased as needed to meet specific requirements, providing a true "connected factory" production environment.

The **Monitoring & Analytics Module** contains eight apps to help you capture all the data you'll ever need, gain simplified access to real-time performance metrics in custom dashboards, and identify and correct negative trends before they become issues. Choose only the functionality that you need.
