Production Control Module

Optimize workflow and streamline production

Offline Feeder Setup Validation
Reduce changeover time and verify feeder locations

Paperless Changeover Instructions
Achieve swift and guided setup and changeovers

Flexible Feeder Setup
Open setup freedom to maximize changeover efficiency

Feeder Low
Minimize downtime and sustain productivity

Barcode Generator
Standardize material identification to elevate factory efficiencies

Work Order Management
*Proactively verify material availability to avoid shortages*

Feeder Tracking
Quickly find feeders anywhere on your line to streamline setups

Component Tracking
Confirm inventory location and balances for uninterrupted workflow

Choose the modules and apps for your requirements

Universal's IQ360™ Factory Software Suite is comprised of user-focused smart factory modules designed to control, monitor and improve all aspects of factory operations for maximum productivity. Each module offers dedicated capability bundles and some select apps that can be purchased as needed to meet specific requirements, providing a true "connected factory" production environment.

The **Production Control Module** contains six apps to help you eliminate bottlenecks, optimize process steps, streamline change-overs, implement automated threshold alerts, and track and drive performance against operational targets. Choose only the functionality that you need.

Apps	Requires Base License	Capability Bundles	
	Line Control	High-Mix	Available Individually
